

Develop Security and Biosecurity Plans:

What security and biosecurity personnel training will be accomplished?

Develop a list of diseases that can be targeted to protection from control?

**For the diseases identified, evaluate and develop an outline for the following;
Risk, Training, Animal Resistance, Isolation, Traffic Control, Sanitation, Action
Trigger, Rapid Response.**

What can be done to control ACCESSABILITY?

What measures can be taken to isolate your animals from disease?

What traffic control steps can be taken to protect your animals from disease?

What sanitation procedures can be taken to protect your animals from disease?
